Christopher Daigle

pcjdaigle@gmail.com

quantchris.com | github.com/christopherdaigle/ linkedin.com/in/christopherdaigle

Data Science leader specializing in Natural Language Processing and Generative Artificial Intelligence • Army Veteran • Helping teams realize their best work and expanding organizational capabilities

Technical Skills

Technology: AWS • Python • SQL • Git & GitHub • Bash / Unix / Shell • Pandas • NumPy • SciKit-Learn & StatsModels • HuggingFace • SpaCy • PyTorch • NLTK • Gensim

Quantitative: Foundation Models / Transfer Learning • Natural Language Processing (NLP) • Machine Learning • Statistical Analysis & Predictive Modeling • Supervised & Unsupervised Learning

Professional Experience

The Hartford Financial Services Group, Inc. - Director of Data Science Generative AI Factory - Organization Lead

Jul 20 – Pres. Dec 23 - Pres.

- Responsible for creation and deployment of enterprise generative artificial intelligence (GenAI) assets
- Lead 7 direct-reports of data scientists, data engineers, product owners, prompt engineers, and machine learning engineers for development and deployment of GenAl solutions
- Collaborate with leaders across diverse domains to identify both short and long-term opportunities among options like commercial solutions, customizations of foundation models, and from scratch solutions
- Inform and execute the GenAl vision as a federated and centralized model for the enterprise
- Evangelize and educate technical and non-technical audiences at the enterprise level on generative AI capabilities through speaking, publishing internal materials, and designing & conducting trainings

Artificial Intelligence Factory - Director of Data Science

May 22 – Dec 23

- Technical Lead for Generative AI and NLP responsible for strategy and delivering solutions with small teams, evaluating vendors, training employees from senior leaders to individual contributors, and routinely presenting to the C-Suite and audiences >400 people
- Developed conversational search (RAG) for underwriters in <4-weeks by defining and developing the solution, collaborating with ethics & legal to ensure compliance, leading a team of 5 data scientists, data engineers, prompt engineers, and machine learning engineers (MLE)
- Developed and deployed sentiment analysis application in <1-week for investor communications (RoBERTa)
- Developed a Topic Model (LDiA) to understand customer feedback which influenced efficiencies in the survey review process and improved customer satisfaction
- Managed two data engineers, one data scientist, two interns, mentored data scientists and engineers Claims Data Science, Workers Compensation - Senior Data Scientist Jul 20 – May 22
- Developed 4 and maintained 9 predictive models for Workers Compensation Data Science
- Managed one data scientist, mentored 5 data scientists, and provided technical and non-technical training to over 100 scientists, engineers, product owners, and business customers
- Guided development of data science models resulting in improved solution performance and increased technical skill for a team of data scientists over a suite of data science solutions
- Standardized data science practices around peer review, software engineering, version control, and Agile
- Created framework for MVP model creation reducing initial model build from 1-month to < 1-day

Pratt & Whitney - Manager, Data Scientist

Jan 19 - Jul 20

• Established the analytics department for Commercial Engines Aftermarket Supply Chain

Boise Analytics - Partner, Data Scientist

Dec 17 - Jan 19

Responsible for 43 business-to-business relationships and lead 20 data scientists

University of Connecticut – *Economics Instructor*

Aug 16 – Aug 18

Boise State University - Economic Researcher. Teaching Assistant

Jan 14 – May 16

AAI Corporation – Senior Flight Crew/GS-15E, Lead Pilot, Instructor Pilot, Standards Pilot Oct 10 – Apr 13

US Army – Sergeant, Drone Pilot

Sep 04 - Oct 10

Products & Portfolio

MLC Underwriter Conversational Search Generative Artificial Intelligence (proprietary solution)

Purpose: provide conversational responses answering questions from Middle and Large Commercial Underwriters Outcome: reduction in time to finding the desired answer from an average of 10-minutes to 5-seconds

Machine Learning / Generative AI: retrieval augmented generation, sentence-embeddings, semantic search, conditional generation, FLAN-T5-XXL, quantization, LLM.int8()

Technology: SageMaker, GPU, Python, HuggingFace, sentence-transformers, <u>fastertransformer</u>, virtual environments, VSCode & Jupyter, GitHub

Voice of the Customer Topic Model (VOCT) *Natural Language Processing* (proprietary model)

Purpose: identify themes in high volume and high velocity customer survey response data

Outcome: reduced review time by 10x, increased reviewed surveys by 50x, ensured consistent interpretation of customer feedback, provided ability to measure trends in customer themes to drive investment for improving customer experience

Machine Learning: NonNegative Matrix Factorization (NMF), Latent Dirichlet Allocation (LDiA, LDA), collocation (PMI) n-grams, sentiment analysis, coherence, perplexity, count vectorization

Technology: AWS SageMaker, AWS S3, Python, bash, SnowFlake, Oracle SQL, Scikit-Learn, SpaCy, HuggingFace, Gensim, NLTK, TMToolkit, Top2Vec, Matplotlib, conda environments, VSCode & Jupyter, Git & GitHub

Workers Compensation Triage Suite Data Science (9 proprietary models and methodologies)

Purpose: identify claims that are most likely to be complex for claim handlers and nurses to manage (8 separate products)

Machine Learning: GLM (Logistic Regression, Gamma, Tweedie, OLS), Random Forest Regression & Classification, Decision Tree, GBM, VAE, KMeans, DBSCAN, FAMD, MCA, Anomaly Detection, Hypothesis Testing

Technology: Python, Linux, Oracle SQL, Sklearn, H2O, StatsModels, SciPy, PyTorch, Keras, Tensorflow, Matplotlib, Seaborn, PyTest, PipEnv, VSCode, Jupyter, Git, GitHub

Rebate Optimization *Software Engineering* (proprietary software)

Purpose: increase rebates from suppliers, reduce spending, and reduce overall cost

Outcome: application to determine the optimal allocation of spending at the part level for 5,000+ vendors over 75,000+ jet engine components resulting in \$29 million cost avoidance per-year

Technology: Python, NumPy, Pandas, Oracle SQL, PyInstaller

Commodity Classification Innovation Natural Language Processing, Classification (proprietary software)

Purpose: identify jet engine commodities from purchase orders executed by global supply buyers

Outcome: Increased speed from 8-hours to instantaneous with improvement from 60% to 90% of \$16 billion of commodities

Technology: Python, SQL, Pandas, NumPy, NLTK, SciKit-Learn (sklearn), Tensorflow and Keras *Machine Learning:* Multinomial Naïve Bayes, AdaBoost, Bagging, Random Forest, TF-IDF *Performance:* 94% F-1 Score. 96% Recall. 93% Precision

Find Donors for Charity Supervised Learning quantchris.com/project/Donor-Classification/

Purpose: maximize the likelihood of receiving donations by predicting if a person receives income exceeding 50k/year Technology: Python, Scikit-Learn (sklearn), Pandas, NumPy, Seaborn, Plotly, PyCharm, Jupyter Notebook Machine Learning: Ensemble Methods (ADABoost, Random Forest, Gradient Boosting), Logistic Regression, KNN,

Naïve Bayes, Grid Search, Feature Scaling (Standardization, Normalization, Logarithmic Transform), One-Hot-Encoding (OHE)

Performance: 87.26% Accuracy, 76.05% F-0.5 Score

Awards

TDAC – Visionary, The Hartford, awarded to top-2% employees and celebrates the innovative solution introduced by a team which showcases their ability to bring fresh ideas and drive transformative change, ultimately propelling our company forward

Special Award – Innovation Award, Pratt & Whitney, awarded to 5 of ~240,000 UTC employees annually Claims Insight Board (2x) – The Hartford, Chief Executive Claims Officer for (1) invention of algorithm with broad and deep business impact; (2) NLP Model

Break Through - Helping Drive Innovation Across DS Teams, The Hartford, Global Speciality

Better The Experience (2x) - The Hartford, Workers Compensation & MLOps

Continuous Improvement (3x) - The Hartford, awarded by multiple executive of multiple organizations

Education

MS, Quantitative Economics (STEM), University of Connecticut, CT (Maj. GPA 3.95)

Certificate, SAFe Scrum Master (SSM - 92474883-9992; expired 2021), Scaled Agile
